DAWIT A. FELEKE

Software Development | Web Applications & Business Systems

Felekedawit11@icloud.com | +251 970 437 830 | Addis Ababa, Ethiopia

dawitfeleke.com | github.com/Dawitom3000 | LinkedIn: dawit-feleke-991b0a288

SUMMARY

Software development contributor focused primarily on web applications and business systems, with capability in mobile application development. Practical experience co-developing and testing inventory systems and business applications using Next.js, React, TypeScript, and Supabase. Contributed code and product design to Aquila at Eagle Point AI, co-developed Future Quest, and independently built and launched company websites. Management experience adds business workflow understanding, product ownership, and teamwork.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, HTML, CSS

Frontend: Next.js, React, Tailwind CSS, responsive website development

Backend & databases: Supabase, PostgreSQL, Node.js, Express, Sequelize, SQLite

Additional capability: Mobile application development; Java and SQLite

AI & data operations: Dataset collection and preparation, client intake analysis, workflow monitoring

Development & delivery: Git/GitHub, Vite, application testing, deployment; Notion, Trello, Slack, Google Workspace

RELEVANT EXPERIENCE

Co-owner & Project Manager

Pinnacle AI | May 2024 - April 2026 | Remote

- Co-developed, tested, and helped deploy 2-3 inventory and stock management systems for importers and distributors using Next.js, React, TypeScript, and Supabase.
- Contributed to the team’s CRM platform for multi-branch operations. The reviewed implementation includes purchasing, receiving, warehouse/shop transfers, stock counts, sales, and customer records; the current version is a local MVP awaiting production setup.
- Translated business requirements into delivery scope and coordinated design, engineering, and strategy across three concurrent client engagements, with a team reaching 20 members.

Project Manager

Eagle Point AI | January 2024 - June 2026

- Co-developed Aquila, contributing code and product design before internal deployment for project and performance visibility.
- Translated operational and client requirements into workflows and supported adoption across an operations team that grew to around 40 employees.
- Directed AI dataset collection operations and analyzed incoming client requirements to define project scope and delivery needs in an AI training-data and evaluation company.

RELEVANT EXPERIENCE - CONTINUED

Product Project Lead (Future Quest); Founder & Managing Director (Headway)

Future Quest / Headway Travel Firm | Future Quest: 2022 - 2024; Headway: July 2021 - Present | Addis Ababa

- Co-developed and tested Future Quest with team members, leading the platform from early development through its 2024 launch.
- Connected student workflows to opportunity discovery, study resources, consultations, and remote application journeys; the prior portfolio reports 2,000+ students served in 30+ countries.
- Built and operated Headway's education consultancy, grounding product decisions in the practical student and institutional client journey.

Head of Marketing and Communications

Next Level Marketing and Communications | February 2026 - Present | Addis Ababa

- Developed and launched the company website, coordinating content, information structure, and delivery. Public source uses Next.js, React, TypeScript, and Vinext/Vite.
- Managed marketing managers and stakeholder communication, supporting clear product messaging and coordination around the public web presence.

SELECTED DEVELOPMENT PROJECTS

Frame by Frame website

Independent Web Designer & Developer | 2026

Designed, developed, checked, and launched a responsive media production website. HTML, CSS, JavaScript, and Vite; source includes contact-form validation and submission feedback, direct email options, and a Three.js camera interaction.

github.com/Dawitom3000/frame-by-frame-agency-website

HR management API

Co-developer | Team project

Co-developed a Node.js/Express backend. Team source demonstrates PostgreSQL/Sequelize models, JWT authentication, roles and permissions, Joi validation, and employee and leave workflows.

github.com/Dawitom3000/HR-managment-system-Backtend

Next Level Marketing website

Website developer | 2026 - Present

Developed and launched a responsive company website with project stories, service pages, campaign imagery, and direct contact paths. Next.js, React, TypeScript, and Vinext/Vite.
